-

Project

Phishing Detection Website

This website helps to detect the fake emails and spam mails. This website is useful for our data will secure from the eavesdropper.

Online Shopping Website

Built with HTML, CSS, and JavaScript, this shopping website includes a login page, homepage, and dedicated sections for men, women, and kids, offering a seamless user experience.

Quantum Secure Email Client Application

This project utilizes the Quantum Key Distribution method and AES techniques to ensure secure data transmission, preventing eavesdropping and unauthorized alterations.
